PERSONAL PROJECTS

GYM Management System
- Designed an interactive and visually appealing gym management system prototype in Figma, showcasing user flows for package bookings and trainer applications. Created intuitive layouts, responsive design concepts, and streamlined navigation for both members and admins to ensure an efficient and engaging user experience.

Telecom Billing System
- Designed an end-to-end telecom billing system prototype in Figma, covering customer billing automation, plan management, and usage tracking workflows. Crafted clean, user-friendly interfaces and interactive wireframes to streamline operations for both customers and administrators.

App like Capcut named as K-Crop
- Designed a CapCut-style video editing app prototype using Figma, featuring timeline editing, filters, and export tools. Focused on intuitive UX and responsive UI, with layered interactions and smooth user flows.

A complete types of posters
- Independently conceptualized and designed a complete branding suite—including posters, ID cards, and hoardings—for a fictional image company. Executed all visuals solo, showcasing end-to-end design skills from layout to final presentation, without affiliation to any external organization.
